

What does it do?

+ Taxi Tracking

Using our program, all taxi drivers connected to our system will be displayed real-time right on your handheld device.

+ Taxi call

Using our app you can reserve and call a taxi to you, No longer will weather or distance prevent you from getting to your destination on time, with the press of a few buttons a taxi will be come right to you.

**"The taxi
that
comes to
YOU!"**

Pick me Up

Driver Status

Drivers are now able to Set a status, showing thier availability. this prevents confusion in that you will always be able to select a taxi which WILL come to you. If a driver's status is busy or inactive they will be unable to take requests during that time.

Here's what you need

Android mobile Device

Android Lollipop 5.0 or higher

Screen of at least 426dp x 320 dp

Color Display Required

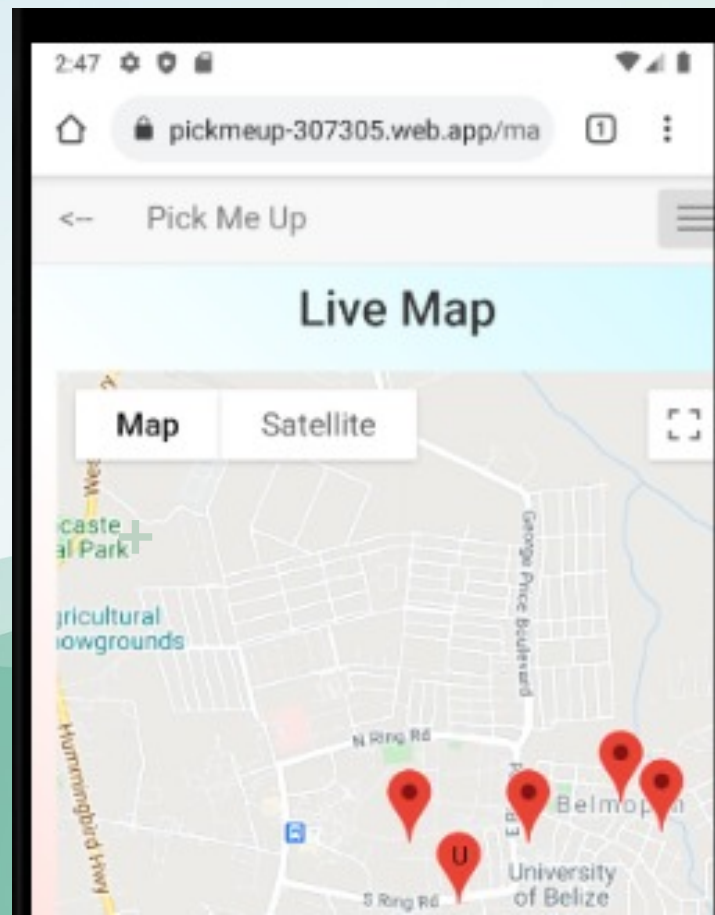

Driver Accountability

Because drivers are required to have an account, users can be assured that drivers will be held accountable for requests and performance. We encourage users to use the optional anonymous Rating feature to rate a driver's performance

Live map

With our live map, you will be able to see exactly where available taxi's are located and its designed in the user in mind with its familiar interface. Easy to use with no hassle.

Future Updates

This is just the beginning of PickMeUp. We plan to expand our services outside Belmopan. We believe that all of Belize should make use of this app, for your safety AND convenience
